

WEB222 Assignment 1

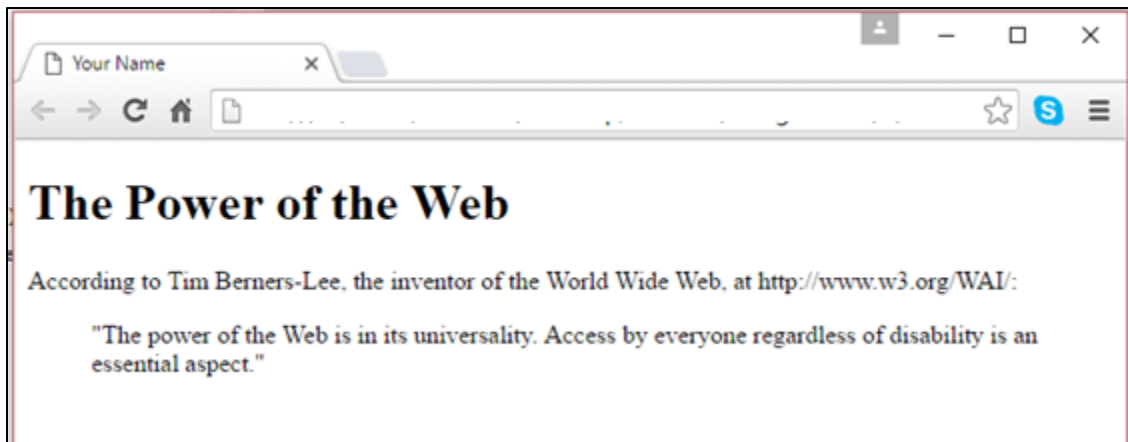

Submission Deadline:

Sunday, Feb 11 @ 11:59pm

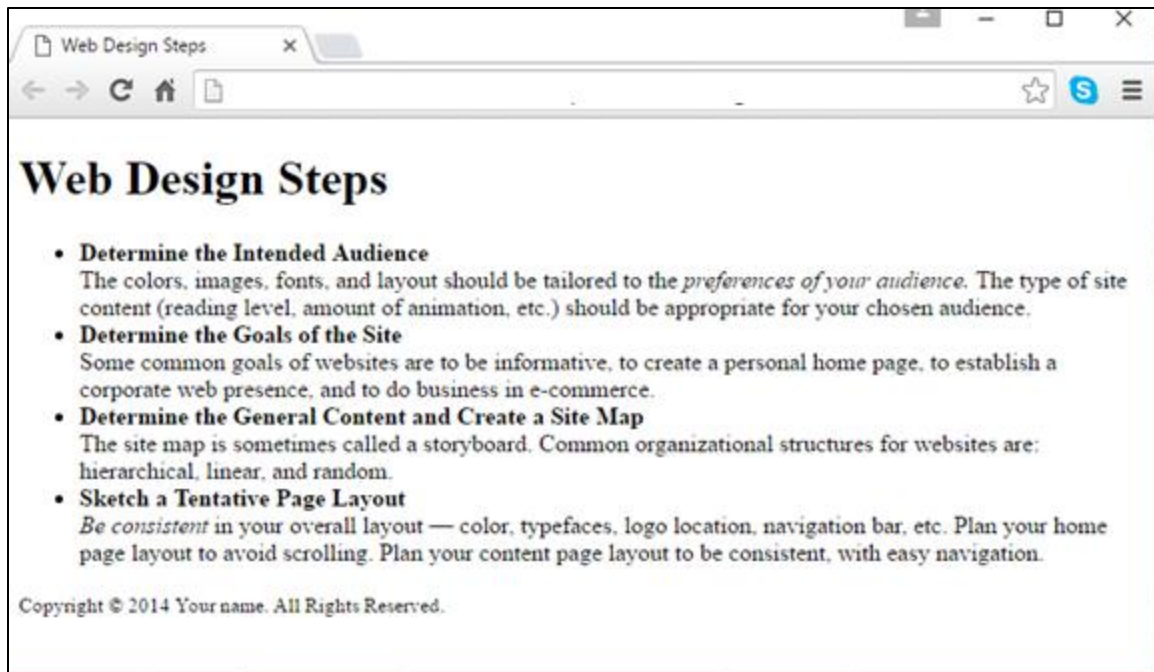

Assessment Weight:

6% of your final course Grade

Question 1) By using “Paragraph Tag”, “Heading Tag” and “Blockquote Tag”, Develop the following webpage. Save it as **ASN1-a_yourname.html**

By using “Heading Tag” and “List Tag”, Develop the following webpage. Save it as **ASN1-b_yourname.html**

Question2) Develop a HTML page as follow and develop proper JavaScript modules (function) to perform the following tasks:

- When user clicks on the “Display current year” button, the current year will be displayed
- When user clicks on the “Display current month” button, the current month of the year (i.e September) will be displayed.

Assignment1: yourname

Note: For part a and b, Please use alert and console.log and document.getElementById() to display the year/month .

Question3) You need to Watch the following video and answer the questions on paper and submit it in the next class. For each question, you need to briefly (in a paragraph of 2~5 lines) explain your answer by an example (JS code):

<https://www.youtube.com/watch?v=5tPO0ncWN9k>

- 1) How to create an array with “new Array()” method and instantiate some values to the array?
- 2) How to show all the array contents with document.write (without loop)?
- 3) What does happen when you assign “null” to an array element and display that element (using document.write)?
- 4) What is the output/main purpose of the following command

```
document.write(arrayName.join("*"))
```

- 5) What is the output/main purpose of the following commands

```
document.write(arrayName.lastIndexOf(value));
document.write(arrayName.indexOf(value));
```
- 6) How to merge two arrays?

Question 4) Develop “Grade Calculator” program which:

- a) Ask user to enter the number of marks
- b) Ask user to enter each mark (0~100 with decimal point) and save them into an Array
- c) The program calculates the total and display the Average

→ Develop the program by using FOR loop.

Question5) Use Modular Programming Approach to Develop a JavaScript program which manages appointments as follow:

- d) Ask user to enter his information including: First Name, Last Name and **Appointment_Day**.
- e) The program will check the **Appointment_Day** with the following Available list
Available_List = {Mon, Wed, Thu}
- f) if the **Appointment_Day** is match to **Available_List**, the following message displays:
Dear ...FirstName ... LastName, You appointment is set on
...Appointment_Day ...
- g) if the **Appointment_Day** is not match with the **Available_List**, the following message displays:
Dear ...FirstName ... LastName, We can't schedule your
appointment now.

→ Develop the program by using developing proper number of Modules (functions)

Question6) Develop a JavaScript function, name it `validateZip(zipcode)` which takes `zipcode` as input parameter and returns true if the zipcode has this pattern: alphabet-digit-alphabet-digit-alphabet-digit, and return false otherwise.

Demonstrate how this function works in NodeJS environments. (hint: you create a js file and run it using `node program.js`)

Assignment Submission:

1. Add the following declaration at the top of your HTML/CSS/Word file

```
/*
*****
* WEB222 – Assignment 1
* I declare that this assignment is my own work in accordance with Seneca Academic Policy.
* No part of this assignment has been copied manually or electronically from any other source
* (including web sites) or distributed to other students.
*
* Name: _____ Student ID: _____ Date: _____
*
*****
*/
```

2. Compress (.zip) the files in your Visual Studio working directory (this is the folder that you opened in Visual Studio to create your code).
3. Record a walkthrough video and demonstrate how the assignment work.

Important Note:

- Submitted assignments must run locally, ie: start up errors causing the assignment/app to fail on startup will result in a **grade of zero (0)** for the assignment.
- **LATE SUBMISSIONS for assignments.** There is a deduction of 10% for Late assignment submissions, and after three days it will grade of zero (0).
 - In case you need any extension, you must submit the incomplete work by deadline and try to submit the complete version afterward.
- Assignments should be submitted along with a video-recording which contains a detailed walkthrough of the solution. Without recording, the assignment can get the maximum of 1/3 of the total.
 - In case you are running out of time, you can submit your project on time and submit the video-recording within 24 hours
